

PERMA PATCH

DESCRIPTION

Perma Patch is a very unique, easy-to-use UV activated, self-adhesive repair patch. It is fiberglass reinforced polyester with great adhesion properties for long lasting repairs. Perma Patch is non-flammable, non-toxic, and adhesive is not harmful to skin. Easy to apply, no mixing, no weighing- one step no mess.

Available in the following sizes:

3" x 6"

6" x 9"

9" x 12"

FEATURES

- Easy application – just cut, peel and stick – finished!
- Extremely durable, fiberglass, reinforced polyester/plastic
- Flexible and waterproof
- Weather and UV resistant
- Can be drilled, tapped, sanded and painted in less than an hour
- Resistant against many chemicals, solvents and oils
- Constantly temperature resistant from -40 °F to 392 °F
- No shrinkage or expansion during the application or after curing
- Bonds to all surfaces except polypropylene (PP)
- Fast curing (Starting with 5 minutes depending on UV intensity)

HOW TO USE

1. Surface should be cleaned, dry and free of any contaminates.
2. Remove from aluminum pouch. Cut Perma Patch into any size you want without exposing to UV/ sunlight. Place remaining material back in aluminum pouch.
3. Remove white backing tape to expose the sticky resin, apply patch then remove transparent film backing on other side after application.
4. Apply Perma Patch to repair area with sticky side down. Press firmly and expose to UV/sunlight. Curing times depending on UV intensity between 5 minutes (sunny) and 50 minutes (cloudy)
5. If indoors use a UV flashlight for 10 minutes.

SPECIFICATIONS

Physical Form	Soft, tacky material
Color	Various
Odor	Sweet
Flash Point (TCC)	840 °F
