

# CRACK GONE SUPER

## Asphalt Emulsion Crack Filler

### DESCRIPTION

Crack Gone Super is a premium cold application crack sealant for asphalt and concrete sealing. Applied directly from the container without heating or mixing, Crack Gone Super produces a tough, flexible membrane which reduces water intrusion. It is used to seal cracks and joints on concrete surfaces, asphalt surfaces, and where structures meet sidewalks and/or driveways.

### CAUTION

Please refer to the SDS for more detailed precautionary measures, handling instructions, and emergency procedures.

KEEP OUT OF REACH OF CHILDREN.

Not Recommended for cracks wider than 1/4" and deeper than 1/2".

Do not store below 40°F.

Protect from freezing.

### DIRECTIONS

**Preparation:** Clean crack thoroughly with a router, wire brush, or scraper. Follow with high pressure air or water. Wear eye protection. Remove all standing water. See TDS for detailed info.

**Application:** Stir to uniform consistency and color. Apply so material forms a bead slightly above pavement surface. Squeegee into cracks between 1/4" to 1/2" wide. Apply when air temperature is 45°–90°F and rising. DO NOT APPLY WHEN RAIN IS EMMINENT. In 90°+F dust the surface of the newly applied sealant with sand after formation of surface membrane to reduce change of tracking.

**Clean Up:** Immediately after use flush equipment with water. Dried Crack Gone Super can be removed with mineral spirits, kerosene, or fuel oil.

To assure a traffic-resistant surface, pavement should be closed to traffic overnight and reopened when dry.

*Please refer to TDS for detailed instructions.*

### FIRST-AID

**Eyes:** Remove contact lenses. Flush with luke warm water for 15+ minutes. Do not rub or scratch eyes. If irritation occurs, seek medical attention.

**Skin:** Wash with soap and tepid water (not to exceed 90°F). Remove contaminated shoes and clothing and launder. If symptoms occur, seek medical attention.

**Inhalation:** Not expected to be a route of exposure as provided. If respiratory symptoms develop, seek medical attention.

**Ingestion:** DO NOT induce vomiting or give liquids. Rinse mouth with water. If vomiting occurs, keep head below hips to prevent aspiration into lungs. Seek medical attention.
