

WRENCH EASE

Nut and Bolt Release

DESCRIPTION

Wrench Ease is a penetrating lubricant for loosening nuts and bolts, and dissolving rust instantly. For use anywhere a light oil lubricant is needed. Other applications include frozen battery terminals, speedometer cables, brake cables, oxidized metal parts, tools, watches, air tools, jammed locks, pipes, aluminum heads, motor block studs and bolts, broken taps, starters, etc.

FEATURES

- Displaces moisture
- Protects all metals
- Lubricates as it loosens
- Contains no acids
- Cleans sludge, dirt, and grease
- Dissolves rust instantly
- Penetrates even countersunk threads

FIRST-AID

Eyes: Rinse eyes cautiously with lukewarm water while holding eyelids open for several minutes. Remove contact lenses if easy to do so. Continue rinsing for 15–20 minutes. Take care not to rinse contaminated water into unaffected eye or face. If irritation persists, get medical attention.

Skin: Remove contaminated clothing. Gently blot or brush away excess product. Wash with lukewarm water for 15–20 minutes. If feeling unwell, get medical attention.

Inhalation: Remove to fresh air. Get medical attention if feeling unwell.

Ingestion: Rinse mouth. Do NOT induce vomiting. Get medical attention.

CAUTION

Please refer to the SDS for more detailed precautionary measures, handling instructions, and emergency procedures. **KEEP OUT OF REACH OF CHILDREN.**

DIRECTIONS

Spray or brush on and let set. The penetrating formula loosens rust and corrosion making it easy to separate the surfaces.
