

TRI-CHEM

POLAR LIQUID

Liquid Ice Melter

DESCRIPTION

Polar Liquid ice melter melts snow and ice immediately from driveways, walks, stairways, and highways. Polar Liquid works by fast chemical reaction that does not harm concrete or asphalt. Polar Liquid Ice Melt does not leave any white residue and eliminates tracking.

FEATURES

- Liquid calcium chloride
- Works 20-30 times faster than salt
- Will not harm grass or shrubs
- Leaves NO white residue
- Will not track
- Will not pit or etch concrete

CAUTION

Please refer to the SDS for more detailed precautionary measures, handling instructions and emergency procedures. **KEEP OUT OF REACH OF CHILDREN.**

DIRECTIONS

- Spray lightly and evenly over ice surface, about 2 gals per 200 sq. ft. Thawing begins immediately.
- As soon as ice is melted, slush and water should be promptly removed to prevent refreezing. The cycle of refreezing and thawing by natural weather elements can cause damage to concrete.
- The use of an ice melting agent increases these cycles and are factors over which we have no control.
- If this product is used on concrete of questionable quality, or in excessive amounts, there may be flaking and scaling of the concrete surfaces.
- When grass and shrubbery are adjacent to ice surface, particular care should be used to avoid excessive application as it could cause browning.
- The use of this ice melting compound must be at the consumer's risk.

FIRST-AID

Eyes: Flush with copious amounts of water lifting lids and removing contact lenses to ensure complete irrigation—get medical attention.

Skin: Flush with water and then wash with soap and water, launder contaminated clothing before reuse—get medical attention if irritation persists.

Inhalation: Remove to fresh air and assist breathing as necessary—get medical attention.

Ingestion: Do NOT induce vomiting. Rinse mouth with water. Get medical attention.
