

DESCRIPTION

Quick Patch is a 2-part acrylic acrylate fast cure patch or leveling compound which is used to fill large cracks and depressions in severely damaged concrete from a thickness of 1/8" and up. It is ideal for use in heavy industrial and manufacturing areas where a tough, durable surface is required without a long cure time.

Part B

DIRECTIONS

1. All oils, greases, chemical deposits, paints, adhesives, and cement surface latents must be removed. Exposed steel reinforcements should be cleaned free from rust.
2. Substrate must not have a moisture content greater than 15% by volume.
3. Pour contents of Part A (2-quart cans) into overpack container.
4. Stir contents of Part B (31-pound bag) into Part A.
5. Mix until uniform.
6. For small patches, mix 5 parts by volume of Part B to 1 part by volume Part A

Note: This kit will yield approximately 35lbs. of patching material when mixed in its entirety.

FIRST-AID

Eyes: Flush with copious amounts of water lifting lids and removing contact lenses to ensure complete irrigation—get medical attention.

Skin: Flush with water and then wash with soap and water, launder contaminated clothing before reuse—get medical attention if irritation persists.

Inhalation: Remove to fresh air and assist breathing as necessary—get medical attention.

Ingestion: Do NOT induce vomiting. Give water to rinse mouth. Get medical attention.

CAUTION

Please refer to the SDS for more detailed precautionary measures, handling instructions and emergency procedures. **KEEP OUT OF REACH OF CHILDREN.**
