

## TRI-LIGHTNING ICE MELTER

---

### DESCRIPTION

**Tri-Lightning Ice Melter** is formulated to melt snow and ice as low as -20° F, will not chemically attack concrete, and contains special ingredients to reduce corrosion to metal, electrical outlets and automobiles. Tri-Lightning is tinted to improve smooth and consistent coverage, especially during low visibility conditions; our pattern indicator is 100% water soluble, non-staining and bio-degradable. Formulated with “Tech-Grade” improved granule sizing for maximum contact with target areas, **Tri-Lightning’s** flat granule surface provides ideal boring action and is less apt to roll off sidewalks and pavement.

---

### FEATURES

- Effective to -20° F
- Colored tint shows coverage
- Will not chemically attack concrete
- Reduced corrosion to metal, electrical outlets and automobiles
- Low toxicity to skin
- Dust free
- Improved granule size for maximum contact with target areas
- Formulated with anti-caking agents for prolonged storage with minimum clumping
- Carpet safe – leaves no greasy residue and is easily cleaned from flooring

---

### HOW TO USE

Sprinkle lightly and evenly over ice surface, about 2 lbs. per 200 square feet. Thawing begins immediately.

---

### SPECIFICATIONS

<b>Physical Form</b>	Pellets
<b>Color</b>	Aqua
<b>Odor</b>	None
<b>Flash Point (TCC)</b>	None
